PROFESSIONAL SUMMARY

Software Architect with 8+ years at ARBENTIA covering the full lifecycle of Dynamics 365 Business Central and Dynamics NAV solutions: functional analysis with business stakeholders, architecture, AL development, REST integrations, CI/CD deployment and production support. Hands-on with every NAV release from 4.0 to Business Central SaaS, leading C/AL to AL extension migrations and taking AI agents built with Copilot Studio into production. 27 Microsoft certifications, including Power Platform Solution Architect Expert and Agentic AI Business Solutions Architect.

TECHNICAL SKILLS

ERP Microsoft	Dynamics 365 Business Central (SaaS and on-premises), Dynamics NAV 4.0 – 2018, AL, C/AL, extensions, upgrades and migrations
Power Platform	Power Apps (canvas and model-driven), Power Automate, Power BI, Dataverse
AI and Copilot	Copilot Studio, AI agents, Copilot in Business Central, GitHub Copilot
Integration and DevOps	REST and OData APIs, JSON, Azure DevOps (CI/CD pipelines, repos, releases), Git, PowerShell
Data and platform	SQL Server, Azure, Microsoft 365 (administration, Teams, Exchange), Entra ID, Defender XDR, Purview
Practices	Solution architecture, business process analysis, technical leadership, user training and support

WORK EXPERIENCE

Software Architect · ARBENTIA

Mar 2026 – Present

Enterprise solution architecture with Business Central, Power Platform and AI, from ERP modernization to deployment and operations.

- Lead the migration of C/AL customizations to AL extensions for Business Central, defining solution architecture and development standards.
- Design APIs and REST integrations for high-volume business processes with corporate systems.
- Automate delivery with CI/CD pipelines in Azure DevOps and take AI agents built with Copilot Studio into production.

Senior Consultant · ARBENTIA

Mar 2022 – Feb 2026

Technical lead for end-to-end Business Central and Dynamics NAV projects, from functional analysis with the business to production support.

- Led Business Central implementations and upgrades for insurance, healthcare and retail clients.
- Built AL extensions and REST integrations with billing, CRM and BI systems.
- Managed multi-company production environments and defined deployment processes across development, pre-production and production.

Consultant · ARBENTIA Jun 2018 – Feb 2022

Specialized Microsoft Dynamics 365 and Dynamics NAV consulting for ERP implementation and optimization.

- Implemented and configured Dynamics NAV and Business Central in multi-company projects.
- Delivered custom C/AL and AL development: reports, workflows and functional adaptations.
- Automated processes and built dashboards with Power Platform and Power BI; PowerShell scripting for administration tasks.
